

## PLAZA DECK RESTORATION

# **GTS-350**

POSITIVE SIDE

- PLAZA DECK WATERPROOFING RESTORATION MINIMAL DISRUPTION TO NORMAL BUSINESS ACTIVITIES

- DEMANDING 24 HOUR CONSTRUCTION SCHEDULE

- CLIENT PNC BANK FIRST U.S. BANK TO APPLY GREEN BUILDING STANDARDS TO ALL RENOVATION PROJECTS

## PROJECT

PNC BANK PLAZA RESTORATION, PITTSBURGH

## PROJECT SIZE

37,000 SQ. FT.

Applied in around the clock shifts, the Polymer Rubber Gel, GTS-350 systems successfully restored PNC Bank World Headquarters in Pittsburgh on time, under budget and with minimal disruption to normal business activities. Following PNC's passionate commitment to sustainable building practices, Polymer Rubber Gel not only satisfied key green requirements with it's 25% recycled content, but also provided the client with an unsurpassed, high performance waterproofing system. Chronic leakage left un-checked would eventually threaten the structural integrity of the deck, ultimately resulting in costly repairs. The Polymer Rubber Gel, GTS-350 plaza deck restoration system will ensure a leak free structure for decades to come.

With is successful application, GTS-Polymer Rubber Gel system is now a preferred waterproofing system for all PNC construction applications.
